Sustainability at AstraZeneca

Connection to human health

- Removing barriers and creating solutions for healthcare are essential for global health
- Supporting a healthy environment helps prevent the onset and progression of certain diseases and improve health outcomes
- Fostering a culture of doing the right thing across our worldwide operations, including our supply chain, promotes health and wellbeing

Our ambitions for 2025

- Work towards a future where all people have access to sustainable healthcare solutions for life changing treatment and prevention
- Demonstrate global leadership to proactively manage our environmental impact across all our activities and products
- Create positive societal impact and promote ethical behaviour in all markets across our value chain

Access to healthcare
